

Ms2ascii.pl

Ms2ascii.pl is a Perl script that should convert a PBO mSEED file to a time-stamped ASCII file. You must install msi, written by Chad Trabant at IRIS, to run ms2ascii.pl.

To run ms2ascii.pl type

```
ms2ascii.pl inputfile_name
```

Install msi

1. Download msi from <http://pbostrainmeters.unavco.org/software/>
2. Click on msi.zip to uncompress it
3. Cd into the msi directory,
4. Compile msi, type “make” in the msi directory
5. To allow msi to run from anywhere copy it into somewhere such as /usr/local/bin

```
cp msi /usr/local/bin/.
```
