

Trimble data file conversion

UNAVCO 12/4/06

To convert Trimble t00/t01 GPS data files to Trimble dat format, use either the Trimble Data Transfer Utility program (available from www.trimble.com). Once installed, conversion is done by right clicking the t00/t01 file. Or use the Trimble runpkr00 program in the R-utilities package (available at facility.unavco.org/software/download_transfer/trimble/trimble.html)

Use the UNAVCO teqc program (available at facility.unavco.org/software/teqc/teqc.html) to translate the .dat fileset to RINEX.

Sample command line:

```
“teqc -tr d DAT_filename > OBS_filename”
```

Same command line with more options shown:

```
“teqc -O.int [sample rate] -week [GPSWEEK] -tr d +nav NAV_filename DAT_filename > OBS_filename”
```
