

UNAVCO continuous system enclosure and power system

The system is designed with long term (month to years) glaciological data collection applications in mind, such as ice shelf, ice sheet, and glacier data collection. It is also suited for solid earth applications in remote environments. The case is the Mil-Spec Hardigg “Mobile Master 36” and hold six 100Ah sealed lead acid batteries under the instrument board.

Complete power/enclosure/GPS system provided

Room for geodetic GPS and seismic equipment – room for up to 600Ah battery bank under electronics.

External connectors
