- What.** Remarks at 7:00 pm followed by a raffle of EarthScope Consortium gear

Visit us at the **EarthScope Booth**  
Exhibit Hall Booth #1413

## What are we celebrating?

Just as IRIS and UNAVCO collaborated on the 2003-2018 EarthScope Project, the new organization formed by their merger supports science that benefits from geophysical data. It is continuing to operate both NSF's GAGE and SAGE Facilities and to provide all the services the community has come to rely on. The new EarthScope Consortium is a university consortium dedicated to transforming global geophysical research and education.
